

## Installing NOD32 Version 2.7 – Standard Edition

1. Double click on the NOD32 install file.
  - \* **ndntenst.exe** for Windows NT, 2000, XP & Vista.
  - \* **nd98enst.exe** for Windows 95, 98 & ME.
2. Click *extract*
  - \* The default directory is recommended.

The Setup wizard will begin:

3. Leave the installation method as typical and click *Next*.
4. Click on the *I accept* radio button and click *Next*.
5. Type in your **Username** and **password** and click *Next*.
  - \* If you will be updating NOD32 via any means other than the internet (e.g. Network or removable media or do not have your **Username** and **Password** available click on the *Set update parameters later* check box and click *Next*.
6. Setup Configuration is now complete. Click *Next*.
7. NOD32 requires the computer to be restarted to allow changes to take effect. Close all open programs and files and click *Finish*.
